[Common European Framework of Reference for Languages](http://www.cedefop.europa.eu)

- Job-related skills**
- ability to deliver a design that works.
I have worked on projects related with different business types. Experience told me it's not what the designer thinks looks best that matters, but getting to the point where trends will be covered and the final product will work best for the client's business needs.
 - inside-team communication.
I have an understanding of how things work when a design comes to the programming phase, whether it be a simple website or a complex web/mobile application, and can figure out potential problems before the project goes deeper into development.
- Computer skills**
- Expert level experience in Web Design and Development.
Decent amount of knowledge in javascript and PHP after working on a lot of projects in WordPress.
Expert level in audio software for creating, editing and improving quality of audio material whether music for songs or TV/radio related material.

ADDITIONAL INFORMATION

- Publications**
- Several music collaborations with other artists and personal long play and single releases in digital format that can be found online at <http://www.beatport.com/artist/etheric-loopz/132493/releases> or heard in full at <http://soundcloud.com/ethericloopz>
